NEWTEC

the world leaders

combination weigher

characteristics

- New design; weigher and belt systems are integrated in one unit which minimizes need for extra electrical cabinets
- New compact control panel with touch control. Incredibly simple and user friendly control
- New infeed which ensures good distribution of product in the machine
- VarioSpeed replaces auto-stop. Ensures optimum running – also when product is fed irregularly
- Quantity of product in the machine controllable by the touch display
- Option of choosing another simple control panel without touch
- Option of two control panels on one machine (e.g. one at the top and one below)
- Constant monitoring of compressed air for optimum working of the weighing machine
- Detachable pans for simple cleaning and service
- Plastic weigh pan flaps ensuring low noise level.
