

Intake line RH 2400

for potatoe, carrot, onion and much more

Receiving Hopper RH 2400 incl. Soilextractor SE CC and Box Filler BF CK

The Receiving Hopper RH 2400 has a strong bottombelt 2,4 x 5 m. The heavy duty construction makes this machine extremely reliable. Capacity app: 10-80 ton/hour via SEW frequency controller. Adjustable and elastic tipping device with spring back system is standard. Different options are available, such as auto flow control, stairs and platforms, special designed sides, extended version etc.

EMVE soilextractors with spring coils SE CC, rubber stars SE S or net belt SE B can be connected. Also EMVE different box or sackfillers, as well as storeloaders can be adapted.

Soilextractor SE CC
