

ROLLERGRADER KERIAN

For carrots, potatoes, onions and much more...

Mod. X-60 in stainless steel.

The Grader is produced in 3 different lengths. Width is produced in 5 versions, from w= 760 mm. to max 1830 mm. Driven by 1 pc. motor with fixed or adj. speed. The rollers with increasing gap can be disigned to customer spec. Outfeed of graded sizes is done by conveyors to boxes or further processing. The grading is done very silent and with high capacity. Especially good for grading long sized products. For best function the grader needs an aligning table before the grader.
