

Soaking tank

For gentle feed of carrots, potatoes and other vegetables

EMVE Soakingtank with Boxturner.

EMVE Soakingtank is manufactured in several sizes depending on the type of product and the required capacity.
Among other things, you can add air circulation by fan. It gives stirring in the product and some pre-washing.
Water separator/treatment Akva-Sep, can also be mounted.
The box turner can feed the tank from several directions to best fit customers demand.
Out-feed conveyor with fixed or adjustable speed, as well as custom made length.
Pump in the bottom to control the water level and to pump out the mud.
Propeller to stir the bottom to minimize sedimentation.
