

Polisher WE BP

polisher for potatoes, carrots, parsnips etc

*Polisher WE BP 14x3 with
filterconveyor and tank*

- Polisher for potato, carrot and other vegetables. Produced in stainless steel or in partly mildsteel. Models 12x2500, 12x3000, 14x2000, 14x2500, 14x3000 and 18x3500 kapacitet från 1-20 ton/tim. Note! Capacity depending on product.
- 12-14-15 or 18 brushes gives innerdiameter 650, 800 or 1000 mm. Bristles fixed with stainless clips. Short brush for carrots and long brush for potatoes. Rotation for drum and brushes are adjustable with totally 3 motors.
- Simple construction and rotation of the drum with only 2 pc. powerbelts. Brushes/shafts can easily be lifted out sideways from the machine for service.
- Brushsegments can be taken off without taking off the bearings or pulley. The trip-plesealed protected bearings are easily lubricated due to open construction. The bearings are protected by cups filled with grease, to prevent water from getting in.
- The polisher can be adjusted by angle of the drum, the outfeed gate, the drum speed, the brush speed and added water to get optimal polishing.
- Different versions for water recycling and cleaning can be delivered.
